

SAM4S

ER-430M

Electronic Cash Register

Retail Performance

The combination of the Flat Keyboard (90 Programmable Keys) with Price and Modifier Levels allows great flexibility in your sales strategies.

With up to 9,000 PLU's (1,000 standard) and Scanning Capability, the ER430M provides great expandability. You can add peripherals on the two serial ports including a PC, scanner, scale as well as kitchen or slip printers. The ER430M Software Utility allows both programming and reporting to be done via your PC.

Fast Food and Cafe Operations are well provided for with custom features. The Large Flat Keyboard and Scale option makes this a great Fresh Food Market system. Those retailers running monthly accounts will appreciate the new debtors system.

The Cancel Sale function, as well as Error Correct, Void and Return Merchandise functions make for fast, easy corrections and still give a high level of Security. Dual Thermal Printer (44mm) and 2 line LCD operator display make this an excellent register choice.

Ask your dealer for more information.
