- Combines extensive service support from Toshiba TEC Australia

Target markets

- Hospitality (Hotels, Restaurants, Pubs, Bars)
- Pharmacy retail stores
- Specialty retail stores
- Convenience retail stores
- Quick service retail stores
- Grocery stores

Innovative Design

The Toshiba ST-A10 is a low cost POS terminal which is designed for the mass market. The sleek ST-A10 delivers style, serviceability and state-of-the-art technology needed at the retail market for maximum customer service experience.

Space Saving Small Foot-Print

The system has a relative small foot-print (244Wx185Dx339H) which fits into any tight retail environment, thus saving the retailer precious space over the POS counter.

Spill Proof Design and Easy Maintenance

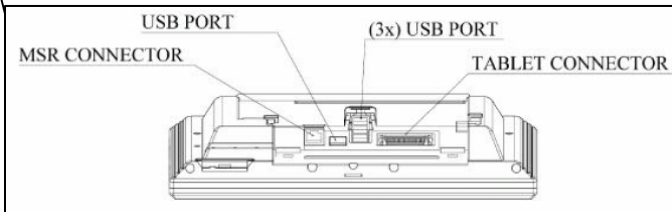

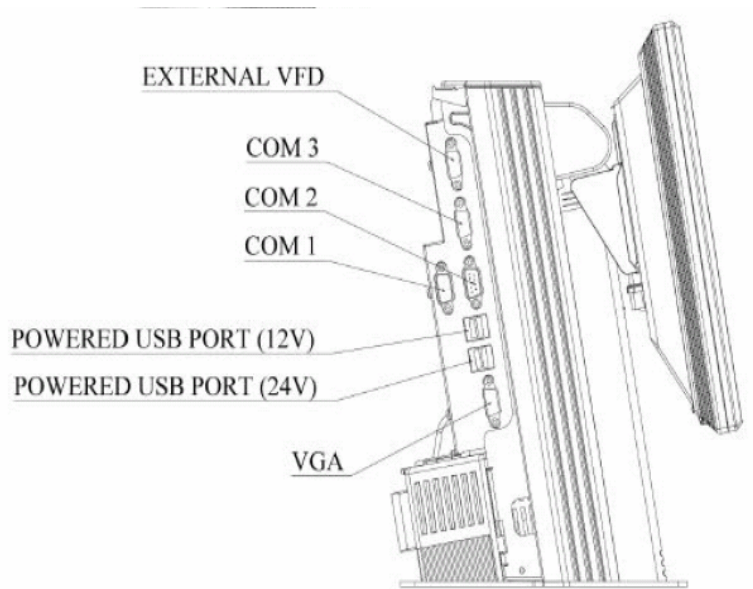

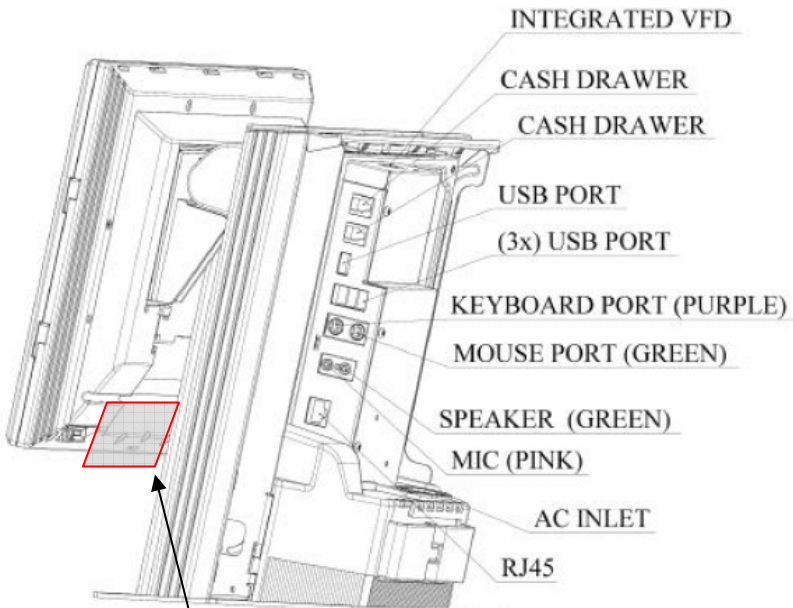

The robust design of the Toshiba ST-A10 complies with the IEC60529 international standard that describes a system to classify the degrees of protection provided by enclosures of electronic equipment. It is tested extensively against dripping water. For essential maintenance, the system is designed for tool-less environment, enabling quick replacement and reduces service down-time.

Affordable and Price Competitive

Designed with the mass retail market in mind, the ST-A10 is priced very competitively, making it one the most versatile and affordable POS system in the market.
